ABSTRACT

Therapeutically active compounds of formula (I) or (II):

$$R_2$$
 R_3
 R_2
 R_3
 R_4
 R_5
 R_5
 R_7
 R_1
 R_1
 R_1
 R_1

wherein the variables in formulas (I) and (II) are defined in the description, and pharmaceutically acceptable salts and esters thereof. The compounds are potent inhibitors of Na⁺/Ca²⁺ exchange mechanism.
